INSECT PEST SURVEY

Bureau of Entomology, U. S. D. A.
and

State Entomological Agencies, cooperating.

Special Report No. 22.

January 30, 1923.

GREEN BUG IN KANSAS.
(Toxoptera graminum Rond.)

On January 10 we issued a Special Report that the green bug was in Collin County, Northeastern Texas. This was followed by a Special Report on January 24 that the insect had been discovered in Northern Oklahoma.

A communication has just been received, dated January 20 from Mr. E. G. Kelly, to the effect that slight infestations have been located in Montgomery and Labette Counties in the Southeastern corner of Kansas.

As yet, no reports of serious damage have been received relative to this insect.
